

Nisida Azzalini – Web Developer

I aspire to be a Web Developer, with particular interest in *Front End Development*. After spending 8 years working in accounting and clerical professions, I am now looking forward to *transfer into the tech industry the skills I learned*. Personal satisfaction and personal achievement is what drives me to do a good job and being a *hard-working and determined* person helps me to reach my goals. I enjoy *collaborating with other people, sharing ideas and knowledge*.

SKILLS SUMMARY

Team-Working

When it comes to work as a team, I believe that communication, planning, empathy and reliability are just some of the skills that contribute to deliver a good product, as well as working in an agile environment. At EDA during the team projects we used Kanban boards and did daily stand-up meetings to manage and organize our work.

Problem Solving

At EDA I worked on improving my approach to handle and solve problems in a constructive way. I have been teaching myself how to simplify a problem by breaking it down into smaller sub-problems and try to solve them one by one, by writing pseudocode and debugging. I usually search for the right tools or information that could be useful for me to come up with a solution.

Flexibility and Adaptability

By doing mostly temporary and short-term jobs, I had the possibility to prove myself in different situations, come in contact with different environments/people and quickly learn and carry out new, various tasks.

Well Organized & Good Time Management

Thanks to my previous experience, I have learnt to prioritize certain tasks and have my job done on time, as well as working under pressure. In my last job, I had to check more than 50 claims and approve at least 35, deal with incorrect payments, and run the report, all within 11am.

Detail – Oriented

In all my various jobs, I always had to run data-entry tasks - keeping up to date the company system, inserting and editing personal and financial information – and that allowed me to improve my accuracy and precision.

PORTFOLIO – WEB DEVELOPMENT

“My Recipe Book”

A Web Application to manage your favourite recipes and browse the public recipes of other users. I enjoyed a lot writing this web application as my personal project at Enspirial Dev Academy. You can have a play with it [here](#). I also enjoyed making a couple of videos to explain [how it works](#), and [how it is built](#).

TECHNICAL SKILLS

- HTML, CSS, JavaScript
- React
- Node.js and Express.js
- SQLite3 / PostgreSQL
- Git, GitHub
- Knex.js
- Debugging techniques in the browser and on the server
- RESTful API
- Command line interface
- HTTP protocol

PERSONAL SKILLS

- Teamwork
- Pair programming
- Problem Solver
- Creativity
- Flexible and Adaptable
- Well Organized and Good Time Management
- Detail – Oriented
- Goal Oriented
- Customer Service Oriented
- Self-Development

[“My Recipe Book”](#)

Gender Equal NZ (National Council of Women)

The project consisted in designing and developing the MVP stage of the [Gender Dashboard web page](#).

The Gender Dashboard is a web page designed to provide data collections, charts, and analysis about the status of "gender equality" in Aotearoa New Zealand.

It is part of a pre-existent website, based on WordPress.

I was teamed up with another Developer and a Chief Storyteller; most of the work was done remotely, with daily catch ups on Slack.

Then, every 2 weeks we met for a review, to talk about goals achieved, next things to do, problems encountered and tasks division.

EDUCATION

Enspiral DevAcademy - Wellington, NZ

Web Development Training Scheme - Level 6 with 72 Credits

University of Udine - Italy

Banking and Finance - Bachelor's Degree

ENSPIRAL DEVACADEMY

Apprentice - Full Stack Developer

Completed between 700 and 800 hours coding on multiple projects in a team/simulated work environment.

Developed high levels of self-awareness and familiarized with different aspects of a work environment through weekly human skills sessions (e.g. agile principles and Scrum practices, appreciation of diversity, empathy and communication skills).

Gained experience in giving/receiving feedback and pair programming.

PREVIOUS EXPERIENCE

Payroll Officer NTA Team - Ministry of Health

Processed and approved NTA registrations, claims and invoices and developed a good knowledge of NTA Policy.

Criminal Record Officer - Ministry of Justice

Inserted and checked applicant details to verify their criminal conviction history and sent back the result to Recruitment Agencies.

Accounts Payable Officer - IHC New Zealand

Supported the accounts payable team by inputting creditors/debtors invoices (almost 200 daily) and run invoices' reports.

Data Entry Operator (casual)- IHC New Zealand

Inserted into the system, the working hours of employees and volunteers (usually 3000 in 5-6 working hours) of each branch of the Company in New Zealand.

Data Entry Operator - Accounting Team - Colliers International

Processed invoices and bank reconciliations.

INTERESTS

Dancing Cuban salsa, cooking, painting, travelling, enjoying long walks
